

March 18<sup>th</sup>, 2022

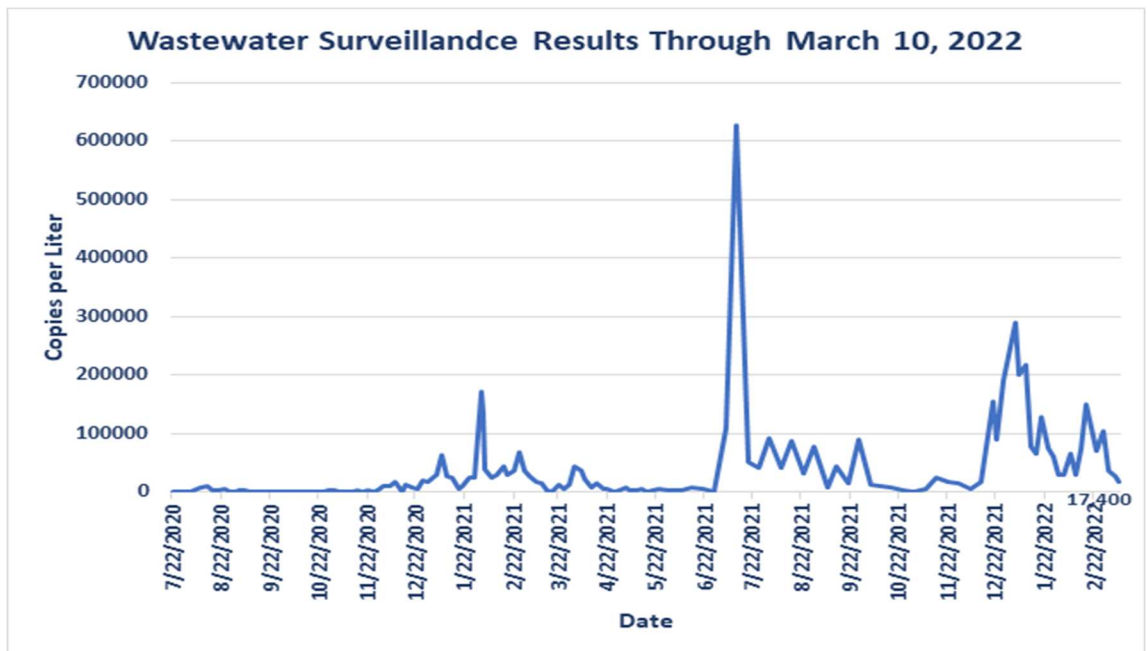

Good day to all,

The Medical Center has been tracking our positivity rate for 2 years. The surge in the Omicron variant has subsided. MCOR feels increasingly confident our community is finally at a point wherein the updates to our tracking grid no longer provides actionable information.

We will continue to monitor global trends. If the need arises; MCOR will once again activate the tracking grid starting from 0. As of Monday, March 14, 2022, Ocean Reef is at 1.6% positivity.

MCOR's tracking correlates with the data generated from ORCA's waste water testing:

In addition, MCOR has been approved for receipt of anti-viral medication. MCOR is working with federally approved distribution partners to secure delivery. MCOR will continue to provide status updates accordingly.

The CDC has created a tool by which counties are able to access their respective risk level. In addition, based on the risk assessment, the CDC has provided applicable protective guidance. The more individuals normalize their respective daily routine; understanding your surroundings remains a critical component minimizing your exposure.

 **Low**

In Monroe County, Florida, community level is **Low**.

## WHAT'S A COVID-19 COMMUNITY LEVEL?

- It's a new tool to help communities decide what prevention measures to take based on the latest data
- Every community in the United States is classified as:

<p><b>Low</b></p> <p>Limited impact on healthcare system, low levels of severe illness</p>	<p><b>Medium</b></p> <p>Some impact on healthcare system, more people with severe illness</p>	<p><b>High</b></p> <p>High potential for healthcare system strain; high level of severe illness</p>

## COVID Data Tracker Weekly Review

CDC is updating the way it monitors COVID-19's impact on our communities by looking at each county's COVID-19 hospitalizations, hospital capacity, and number of cases. In this way, CDC can better inform community-specific recommendations for preventing COVID-19.
